

n-Command Training

(Virtual Instructor-led)

Part Number: 1600NCMMDV

This four hour virtual instructor-led course is designed for those who will be responsible for configuring, maintaining and managing networks powered by ADTRAN internetworking products. This course includes lecture and demonstration sessions explaining the various features and functions of the system.

After the completion of the course, the student should be able use n-Command to configure, manage and maintain ADTRAN internetworking solutions.

To enroll, go to www.adtranuniversity.com.
