Fiber Manager

Total Access 5000 Fiber Manager

The ADTRAN® Total Access® 22-Slot Expanded Fiber Manager enables the Carrier to better organize a chassis loaded with fiber modules. It allows for the routing of fibers through the brackets so that the tangling of the wires is greatly avoided.

The Fiber Manager increases the number of fibers that can be routed on a Total Access 5000 Chassis. It allows for the management of up to 176 fibers with 1.6 mm diameter to the left of the System Controller Module (SCM) and 176 fibers with 1.6 mm diameter to the right of the SCM.

The Fiber Manager mounts to the front and immediately below the Total Access 5000 Chassis, replacing the standard fiber tray. The Manager is shipped with a fan filter holder, mounting brackets, and mounting screws for installation.

Product Features

- Industry-leading 10 year warranty
- NEBS, Telcordia GR-63-CORE and Telcordia GR-1089-CORE Compliant
- Does not require routine hardware maintenance
