

ADTRAN Technical Solutions Associate for Virtual Wireless LAN (ATSA/vWLAN) Curriculum (Online Training)

ADTRAN Technical Solutions Associate for Virtual Wireless LAN (ATSA/vWLAN) is the foundation level certification for technical staff that will be responsible for designing and implementing solutions using the ADTRAN Virtual Wireless LAN solutions.

This training will provide basic data, internetworking, and wireless technology. ATSA/vWLAN consists of two online training courses (Introduction to Internetworking and Introduction to Wireless LAN) that will take approximately twelve hours to complete. The learner must pass a comprehensive exam to obtain ATSA/vWLAN. You must enroll in the exam separately. **To enroll, go to www.adtranuniversity.com.**

Courses

- Introduction to Internetworking
- Introduction to Wireless LAN

Prerequisites

None
