

# NETASSURE

## Consulting Services

### Providing Guidance using Industry Expertise

**Transform your network with ADTRAN NetAssure consulting services.** NetAssure is a suite of pre-launch and post-launch network auditing, planning, integration, and support services. These services are specifically designed to lower operational costs and limit the risks of managing new broadband access technologies or expanding the addressable market of existing broadband services. ADTRAN provides proactive support and rapid response capabilities enabling you to streamline your network operations, accelerate your return on investment (ROI), and ensure your service levels. Partner with ADTRAN to turn your network goals into real, actionable plans.

### KEY BENEFITS

- Minimizes unexpected surprises through better understanding of risk areas within the network
- Supports proactive network planning to ensure a positive customer experience
- Promotes smooth service transitions and rollouts through comprehensive understanding of the network and equipment
- Provides real time solution analysis by leveraging instant access to ADTRAN expertise.
- Increases network reliability by obtaining and utilizing actionable network intelligence

---

## Network Audit Services

ADTRAN expert engineers address your concerns by assessing various layers of your network - evaluating your network infrastructure to uncover network inefficiencies and provide risk assessment of the current state of your network. This helps you to better understand the risk areas within your infrastructure and enables you to proactively plan resolutions that will minimize negative operational and financial implications.

- Provides Comprehensive Network Evaluation
- Offers Risk Identification and Prioritization
- Helps Define Best Practices

## Resident and Remote Engineering

ADTRAN expert engineers serve as a dedicated point of contact and provide industry expertise, best practices, and support. This enables you to accelerate roll-outs and effectively adopt new technologies, enabling major network transformation.

- Offers Instant Access to ADTRAN Expertise
- Provides Advanced Network Analysis
- Ensures Smooth Network Upgrades/Service Migrations

## Virtual CTO

ADTRAN expert engineers provide executive technical resources and knowledge sharing, helping you to evolve your network. Leveraging industry best practices while providing customized situational guidance, your virtual CTO ensures that your technology strategy meets your specific business needs.

- Provides Long-term Senior Management
- Delivers Actionable Intelligence
- Advises on Pivotal Decisions

## ADTRAN Mosaic Network Insight

Mosaic Network Insight is a software-based tool that leverages leading cloud infrastructure, enabling you to better understand your network and dramatically improve your network operations. This software-as-a-service (SaaS) transforms intelligence about your network into usable, actionable information.

- Supports Proactive Network Management
- Reduces Operational Costs
- Enables Long-term Growth
