

# Know Your Network

## Initial Network Assessment

### Why You Need It

Having an accurate view of the current state of your network is the foundation of creating a successful path forward. Let ADTRAN take the lead, helping you get a complete view of your network infrastructure. The Initial Network Assessment arms you with a detailed network topology, enabling you to know the current state of your network so that you can make the right choices for the future of your network.

### How It's Done

Experienced ADTRAN network engineers assess the current state of your network by discovering all network devices, interface types, services, and configurations. That information is then used to provide a comprehensive network topology diagram. This enables you to have a complete understanding of your network, improve network maintenance, and refine network planning. The Initial Network Assessment equips you with a visual drawing of your network infrastructure, inclusive of network devices, connexions, VLANs, SFP/XFP types, circuit types, and other valuable information enabling you to fully understand your network and make the best decisions for network improvements.

### Ordering Information

Service	Part No.
INIT NTWK ASMNT AUDIT 15 NODE	1904NTWASMT15L1
INIT NTWK ASMNT AUDIT 35 NODE	1904NTWASMT35L1
INIT NTWK ASMNT AUDIT 50 NODE	1904NTWASMT50L1
RMT NTWK ASMT REVIEW	1904NTWKRVRMTL1

### Benefits

#### Resolve network outages faster

Don't struggle to figure out what is going wrong and where, know exactly where your equipment is located in the network and how it is connected.

#### Streamline network planning

Knowing where each piece of your network resides makes it easier to add and provision new network equipment.

#### Simplify communication between departments

Having a visual representation of the network allows for smoother interdepartmental communication.
